RISE IN CALL MONEY RATE.

Prices Steadily Receded and Closed at the Lowest-Transactions in Bonds Fell off and Market Showed Irregularity.

NEW YORK, Aug. 16.—Early strength in the stock market to-day, inspired by the favorable London attitude and the better complexion of the Chinese situation was dissipated later on by realizations by the room traders and discussion of the monetary fature. A rise in callmoney rates to 1% per cent caused assertions in some quarters that a stiffer rate would result in the depletion of the bank reserves by gold exports. Operations by the banks thus far this week with the Sub-Treasury show a loss of \$7.755,699. This can hardly be compensated through the interior currency movement, and receipts of gold from tracific coast points, so a heavy loss in cash is expected to be shown in the bank statement. The weekly reports of the European governmental institutions were scanned with interest in connection with their replenishment of resources from here. Less than half of the recent shipments of upward of \$17,00,000 was reflected in the statement. The Bank of Englands returns showed an increase of \$3,850,000 in reserve and bullion increased \$4,150,790. These acquisitions caused more liberality to borrowers, and loans increased \$3,50,000. Its official rate of discount was maintained at 4 per cent, but the open market rate fell 375.

The showing of the Bank of France was less marked in its principal item than last week. Gold holdings increased only \$350,000. While loans were reduced \$3,221,025 and circulation shrank \$3,300.

As the prices of stocks early, in the day was maintained with difficult, Arrolessional traders who have been instrumental in, the week's advance switched over to the short side and let go their (By Associated Press.)

As the prices of stocks early in the day was maintained with difficulty, processional traders who have been instrumental in the week's advance switched over to the short side and let zo their holdings. No increase in outside business was reported, despite the apparent stability of the early movement in railroad stocks. This factor influenced short sales by operators who consider the market top heavy.

While there was but little energetic selling in any quarter prices steadily receded and ended at the lowest. The price level on the day, however, showed but few notable changes. Some wide movements were made in a few of the specialties, includy Sugar, Pacific Mail, Rubber and confolicated Gas. The latter covered a range of over 2 points, early strength being succeeded by a fall, and a final raily resulting on the announcement that the stock was to be restored to an 8-per cent, annual basis.

Reports of a severe cut in prices of structural steel by independent concerns imparted heaviness to the steel group, which was als felt with the general selling of the day, Despite rumored deals of the Ealtimore and Ohio to absorb the New Jersey Central Railroad, the latter stock moved up a point at the outset, but later lost the gain.

Transactions in bonds to-day fell off slightly, and the market showed irregularity. Total sales, par value, \$830,000.

Transactions in bonds to-day let on slightly, and the market showed irregularity. Total sales, par value, \$530,000. United States Government Issues were 24 per cent. lower in the bid price.
